

Photo-Cubism.com Price Guide

My straight photography is available for £50 for an A3 framed print.

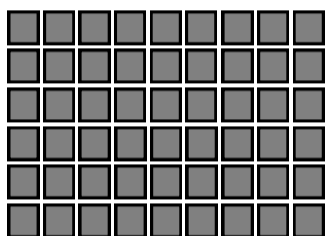

All my prices for the photo-cubism are worked out by the number of blocks, simply £3 per block and then rounded up to the nearest £5, no matter what the material is.

Please note:

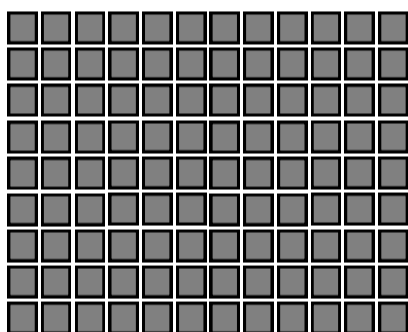

- (i) these are just a few choices - any shape or size is available, and unless requested, all blocks are 45mm x 45mm.
- (ii) other sizes of block can be harder to source or manufacture and may incur extra expense.
- (iii) prices do not include shipping charges.

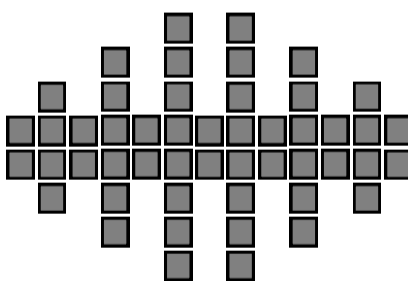

This size piece is 3 x 3 blocks and they all made from solid pine. £25

A3 size prints can be typically mounted on a 9 x 6 pine block sculpture. £160

A2 size prints can be mounted on a 12 x 9 block sculpture. Pine is now too heavy so these are Polyurethane blocks. £325

Because of the modular nature I can make these pieces any shape desired. In any shape up to 80 blocks pine is used, beyond that Polyurethane. Also note that there will be an extra charge for framing any complex shapes

Commissions involving pictures other than my own can involve an extra period of editing and cropping, resizing for the printers, as well as scanning if I work from prints. There is a small extra charge for this.

The Electri-Cities are available on commission for any possible height and surface area, ranging from small lamp tables (40cm x 30cm x 45cm, £500) to full size coffee tables (100cm x 60cm x 40cm, £3000) and beyond. All prices greatly depend on the desired complexity of the cityscape and inclusion of other functional elements - music player, digital photo frames, working computer system, etc.
